Activate Device Available Activations Activation History

To obtain an activation key please enter your routers system key below. The system key can be found in the routers Web GUI in **Status > Activate** and for SuperChannel in **Wireless > SuperChannel**. Every device can be re-activated if you had to re-flash it for any reason.

Important note: Please take care to choose the right license type when activating. For instance: Entering a system key for SuperChannel but selecting "dd-wrt" as license type will return an error message quoting that you entered a wrong key.

License Type System Key

[Dropdown] [Input Field] Activate

Latest DD-WRT Releases

Latest stable release
v24 SP1 (Build10020)

Latest development release
v24 preSP2 (Build13064)

To obtain the matching version for your router please use the Router Database:

Router-Database
